Simple to use:

After choosing a quality grout follow the directions below.

1. Tear seal (A) and remove inner self-dissolving pouch (B)

2. Drop entire self-dissolving pouch (B) into the grout (C) during the mixing process. Mix as manufacturer recommends, no extra time or steps are required.

GROUT PROTECTION THAT MAKES YOUR GROUT THE BOMB!

DO IT ONCE AND DO IT RIGHT WITH GROUT BOMB!

Experience the Benefits:

- ✔ Improved Color Consistency
- ✔ Aggregate adhesion
- ✔ Workability
- ✔ Overall Durability/Improved Reaction time in Stain Cleanability*

Sealing action provides a built-in reaction time for cleaning up spills and other messes that would normally damage unprotected grout.

Use with sanded or un-sanded grouts.

Grout Bomb adds an integrated sealer into Portland Cement Grouts before application, no need to seal later.

1 pouch can be used with 7 to 25 lb. grouts.

A high-performance formulated admixture which features pozzolan, polymer and a hydrophobic chemistry designed to enhance all types of cement grout. The pozzolan reacts with calcium hydroxide formed when cement is hydrated. The polymer protects pigment particles from chemical reaction, locks in pigments and aggregates, for enhanced color uniformity and improves the flexibility of the grout. Grout Bomb® reduces mottling, dust, and increases repellency and stain protection for added reaction time*

*Please clean stains as soon as they happen for best overall performance
